SUSTAINABILITY  
POLICY, PLANNING, POLITICS  
PROFESSIONAL DEVELOPMENT**

*Note: To participate in this webinar you will need a computer with speakers and a stable internet connection. No telephone conference call line will be available for this session.*

The Urban Design and Equitable Development webinar features two distinguished panelists with extensive experience in urban design, equitable development and urban planning. This webinar will showcase real-world opportunities, challenges and practices targeting equitable development and urban design within African-American and Latino communities.

## Learning Outcomes

- Recognize how to account for equitable development in urban design and planning practices with respect to diverse cultures, building typologies/techniques, socio-economic outcomes and returns on investment.
- Improve understanding of the role of urban design in promoting equitable development and better design practices within communities of color.
- Learn how to communicate urban design and equitable development connections with community stakeholders and officials with greater depth and sophistication.
- Explore approaches for leveraging resources to reinvest in communities of color and encourage community parity.

Designed as part of a broader series of upcoming webinars on the issue of minority communities and social equity in planning, it is an ideal learning and professional development opportunity for planners, architects, urban designers, officials, developers, academics, public agencies, students and other professionals in allied fields.
